

## Anne B. Young, MD, PhD, Neuroscience Translational Medicine Fellowship

Massachusetts General Hospital is pleased to announce that we are accepting applications for a joint MGH/Biogen Idec training program in translational neuroscience. The two-year, clinician scientist program is open to young neurologists who will receive an exceptional training experience for drug development, capitalizing on the expertise of those at Biogen Idec and Mass General. Applications from other institutions are encouraged.

The program objective is to train clinician-scientists to rapidly and efficiently translate advances in neuroscience into treatments for people with neurological disorders. The awardee will learn about the entire life cycle of therapy development from both industry and academic perspectives. This includes, but is not limited to, therapy selection, biomarker development, trial design, operations and regulatory science. This didactic, hands-on training program will increase the number of well-trained clinical investigators who are passionate about drug development in the neurosciences.

Each awardee will develop a research project under the guidance of a mentoring committee that includes at least one Biogen Idec and one Mass General mentor. Awardees are expected to present their work in regular meetings and to publish results of their research in peer-review journals. Awardees will spend time at both Biogen Idec and Mass General.

The program provides annual salary support commensurate with experience plus fringe benefits. The awardee may receive additional support for course tuition, travel, computer and supplies. Additional support of his/her clinical research project may be available depending on the research project.

Program period: July 1, 2022– June 30, 2024

Position available: One

Application: Application will be reviewed on a rolling basis with a final due date of November 1, 2021

### **Eligibility:**

- Physician scientist who is or will be a BC/BE Neurologist by July 1, 2022
- Fellow or Junior faculty in Neurology
- Ability to commit 50% of time to Biogen and 50% of time to MGH

**Applications:**

- Letter of interest outlining career goals and why and how the program would advance these career goals (2 pages maximum)
- Curriculum Vitae (CV)
- Two letters of support
- NIH Other Support – current and pending grants
- Application must be submitted by November 1, 2021 for consideration

Your applications will be treated as confidential documents

Please submit your application in PDF format and email Erica ([eratti1@bwh.harvard.edu](mailto:eratti1@bwh.harvard.edu)) by November 1, 2021.

If you have any questions about the program, please feel free to reach:

# Translational Neuroscience Fellowship Application Form

Applicant Information			
Name	Last	First	Middle
Date of Birth	MM	DD	YY
Address	Street		
	City	State	Zip Code      Country (if other than US)
Telephone	Home		Cell      Emergency
Email			
Immigration Status - for non-U.S. citizen only			
Immigration Status	Permanent Resident	Expiration date (MM/DD/YY)	
	Visa Holder	Type of Visa      Expiration date (MM/DD/YY)	
		<input type="checkbox"/> J1 <input type="checkbox"/> H1 <input type="checkbox"/> F1 Others (please specify)	
Education and Certification			
Premedical Degree	Degree	Institution	Year Graduated
Medical Degree	Degree	Institution	Year Graduated
ECFMG Certificate	If you are foreign trained and/or graduated from a non-US medical school, please provide your ECFMG information and include a copy of ECFMG certificate.		
	Foreign Trained Country	Certification #	Issued Date (MM/DD/YY)
State License in US	State	License #	
	State	License #
